

[L2-DE] Data Engineering with KNIME Analytics Platform: Advanced Online

Day 1	
Flow Variables & Components	Flow Variables Components Configuration nodes Widget nodes and re-execution
Workflow Control and Invocation	Loops IF and CASE switches Try-Catch Workflow invocation
Day 2	
Date&Time, Databases, REST Services, Python & R Integration	Date&Time data In-database processing REST services Python and R integration
Introduction to Data Engineering	Data sources Structured and unstructured data Data storage Writing & loading to databases Logging events
